

360 REGIME BIOME MASKS

Technical File

Description

Target multiple skin concerns by taking a 360-degree approach to your skin's microbiome with this set of 5 serum-based masks. A great starter pack for clients with multiple concerns or for those wanting to experience the full spectrum of skincare results from hydration, anti-ageing, radiance, protection, and balance.

This pack of 5 contains one of each type of Sequential Skin Mask. These serum-based masks are designed to increase skin health through a unique and targeted approach that focuses on increasing the skin's microbiome. They contain carefully-curated, functional ingredients to target specific skin concerns and pre and postbiotics, gentle and natural formulations, and carbohydrate derivatives for nutritional replenishment.

Whilst there are immediate and noticeable results from a single-use, these masks should be used regularly and repeatedly for optimal results. The skin will feel balanced, luscious, and healthy, as the results appear more prominent after 24-48 hours of use. Ideal for clients with multiple concerns or for at-home use or gifting purposes.

This Semi-Gel Tencel (100% organic cellulose) mask ensures optimal comfort. Luxuriously silky, flexible, and comfortable, this mask preserves the integrity of the key ingredients without absorbing them, unlike conventional masks. The active ingredients remain potent and are distributed evenly once in contact with the skin. After 16 hours of mask application, the richness and evenness of the bacteria in the skin are increased, resulting in a rebalanced and healthier skin microbiome.

Containing a rich cocktail of pre and postbiotics and carefully-selected antioxidants, vitamins, and gentle actives to rebalance the skin microbiome and pH levels.

Benefits and Features

- With micro-organisms and metabolic by-products, as well as Lactobacillus Ferment, Lactic Acid, and Saccharomyces Ferment Extract, plus pre and post biotics and unique ingredients within each mask, the skin microbiome diversity is increased.
- Extensive in-vivo testing results indicate a decrease in unhealthy bacteria and an increase in the skin microbiome diversity and overall health
- Suitable for any skin type but most effective for skin that is problematic and has inflammatory skin conditions such as acne, rosacea, or sensitivity

Key Ingredients

- As listed on each mask. Please see the complete list of ingredients on the individual mask page.

Salon Use

Apply the mask after cleansing the skin at the beginning of the treatment. Make sure to scoop out any surplus of the formula from the package and apply it over the top of the sheet. Leave the mask on for 15 minutes. When removing the mask, gently massage the remains into the skin for a few minutes. Do not rinse off.

You can use a tissue to absorb any excess. Then, continue your facial treatment as recommended.

Home Use

This is a great mask to use at home. It's very simple to apply and leaves no mess. Plus, the results are visually impressive. After cleansing the skin apply the mask on the face and leave it on for 15 minutes. Remove and gently massage the ingredients into the skin. Follow with the usual morning or evening skincare routine.
