

Anti-Stries

Dermis Restructuring Cream

Body Line

Anti-Stries is an extremely concentrated formula that effectively restores tissue elasticity. It is recommended for the prevention and restoration of stretch marks.

Size: Retail 125 mL/Salon 150 mL

About

Key Ingredients

One peptidic compound.

Stimulates exhausted metabolism and cellular respiration.

Polypeptides and glycopeptides compound of small molecular weight.

Stimulates the mitochondrial respiration (+187%).

Lactoferrin, a protein obtained from 2-thioxanthin and 8-hydroxanthin.

Firms the dermal and epidermal tissues.

Palmitoyl oligopeptide including glycine, arginine and methionine.

Restructures elastin and collagen, which contributes to restore tissues elasticity.

Palmitic acid grafted on a glycine-histidine-lysine peptide.

Powerful cellular stimulator of collagen synthesis. Protecting and repairing.

Actions

The exceptional nutritive active ingredients contained in Anti-Stries enable a better synthesis of the collagen and elastin, which ensures the restructuration of distended tissues.

Anti-Stries also helps to maintain or to restore tissues elasticity.

Use

Conditions

Anti-Stries is recommended for the prevention of stretch marks on the bust and the body. Ideal during pregnancy.

It is also use for the restoration of areas affected by stretch marks and distended tissues.

Anti-Stries is ideal to restore dermis elasticity on the body and arms.

Home Use

Daily Morning and/or Evening

Prevention of stretch marks during pregnancy:

Apply a small amount to the stomach and bust. Can be followed by an application of Synchro.

Restoration of stretch marks: Apply a small amount to the affected areas.

Loss of dermal elasticity: Apply a small amount to areas where skin slackening is noticeable.

Salon Use

Refer to Stretch Marks or Firming Treatments

Anti-Stries should be used after the specific bust or body products.

Follow with the application of Self Heating Mineral Mask.
