

Crème GG

Perfecting and Illuminating Cream

Make up Line

Gernétic expertise in Skin Care is now pushing the boundaries of Make-Up. Crème GG instantly transform the skin making it brighter and unified.

Size: Retail 30 mL tube

About

Key Ingredients

From the Vegetal Realm and Biotechnology

Ferments, peptides, oils and plant extracts, nutritive molecules, cell growth stimulator and natural skin anti-fatigue factor.

Internal effects

Crème GG associates all the necessary elements for proper cellular health and functions.

From the Mineral Realm

Pigments: insoluble colouring powders.

Iron (red, yellow and black) and titanium (white) oxides give their colour to the cream.

“Magic” microcapsules release the tinted micro-pigments when spread onto the skin.

Visual effects:

Provides colour, light reflection and soft touch. Mattifying and protective.

Silicone-free soft-focus microspheres

Soft-focus is a word borrowed from photography that defines the optical effect brought by the tiny particles in the product that disperse light and blur imperfections such as wrinkles.

Protective agents against UV

Actions

Focussing on Appearance and Beauty

The skin appears luminous

The skin regains its vitality

The skin is protected

The skin no longer shines, its touch is soft and powdery

About

A Perfect alchemy between plants and minerals

Presentation:

A smooth cream for an easy application.

Colour:

Lightly beige revealing its real tint when applied.

Fragrance: Elegant, floral and spicy.

Use

Skin Conditions

Ideal for all skin types all year round.

A single shade is adapted to all complexions:

Light complexion:

gives a healthy glowing look

Dark complexion:

evens out the skin tone and hides any imperfection

Home Use

As required

Apply *Crème GG* evenly to the entire face and neck as a day base for a natural effect on top of the necessary Gernétic Skin Care products.

Salon Use

Finishing Touch

Crème GG can be applied at the end of any Gernétic Skin Care Treatment.
