

let's get  
*practical*

The Nimue Thermal Detox peel is a flash treatment with a foaming action and thermo-sensory mechanism.

**?**  
**Application and  
removal of  
Nimue's Thermal  
Detox Peel**

Once bubbling has subsided or after the peel has been on for 7-10 minutes, you will remove with water and disposable compresses. Follow with a Nimue-TDS™, Aftercare Hydrator and Nimue SPF

This warming peel deep cleanses with its bubbling and foaming action, as well as detoxifies, oxygenates and exfoliates the skin, leaving it smooth and radiant.

Apply the Thermal Detox Peel with a dry brush, using Nimue's Professional treatment application technique.
