

PREPARATION

Exfoliating Enzyme

500ml

pH5.5

The enzyme complex forms an important part in the Skin Health Programme as it gently detaches dead skin cells and promotes cell renewal.

Active ingredients

primary ingredients

- Papaya Enzymes (Papain)
- Pineapple Enzymes (Bromelain)

secondary ingredients

- Orange Oil Extract (anti-inflammatory, anti-bacterial, uplifting fragrance)

Product benefits

- Non-irritating, non-abrasive enzymatic exfoliation
- Refines skin texture
- Imparts smooth and radiant skin
- Combination of fruit enzymes help digest protein bonds between stratum corneum cells without over-stimulation
- Optimises penetration of active ingredients

Application technique

- Decant one or two pumps (1 = 5 ml) into a clean glass bowl
- Mix vigorously with a wet brush in glass bowl
- Apply an even layer with a wet brush (use warm water) onto a dry skin: to face, neck and décolleté area
- Leave for 2 minutes before massaging vigorously with warm water for 8 minutes to activate the enzymes
- Remove thoroughly with water saturated gauze swabs. Repeat if necessary
- Steaming may be incorporated during the activation but is not a necessary protocol with Nimue
