

Super Hydrating Serum

30ml

pH5.0

A booster treatment for additional hydration and anti-ageing support in all skin types and conditions, particularly those exposed to seasonal changes, thereby **restoring** skin health.

Active ingredients

primary ingredients

- Phytoprotect (protects and regenerates the skin barrier)
- Hydrating Bio-complex (restores skin functioning)
- Hydrosoluble Xylans Algae Extract (rejuvenating properties & restores skin functioning)

secondary ingredients

- Nano Emulsion via Nanospheres

Product benefits

- Immediate hydration exerts a filmogenic humectant effect
- Reduces and maintains trans epidermal water loss (TEWL)
- Repairs and maintains barrier protection after deep exfoliation treatments
- Actives accumulate in the lower layers of the skin for internal hydration and acts as a water reserve
- Hydrating and collagen stimulating ingredients maintain collagen health and the moisture retaining ability of connective tissue fibres in the skin resulting in skin comfort and softness (if used on a long-term basis)
- Restores the balance and comfort in skins

Application technique

am and/or pm

- May be used as required under prescribed day/night moisturiser
- Apply a thin layer to a clean dry skin after Nimue Conditioner and massage into face, neck and décolleté until fully absorbed
- Allow to dry
- Alternate nightly with Nimue Active Lotion/Gel
- May be used daily as required or for periodic use depending on the skin requirements
- Recommended during the Transitional Period
