tip jar

Active Lotion contains 10% Amphoteric Triple AHA's, allowing for slow release of AHA's and is best for normal to dry skins.

Active Gel has the addition of Willow Bark Extract (natural Salicylic Acid) which reduces sebum and is best for oily problematic skin.

By using Phase 2 homecare in conjunction with Phase 1 homecare, an unhealthy skin will increase active rejuvenation of their skin By 50%

Active Lotion/Active Gel
Are phase 2 products containing 10% Triple AHA Complex at a pH of 3.5. The higher concentration and lower pH increases epidermal and dermal rejuvenation by 20%.

A Client is only on Nimue once Phase 2 has been included in their routine.
