- Hyperpigmented skin
- Problematic skin
- Sensitive skin

5. quick reference guide to treatment procedures and protocols

- Support treatments
- Active treatments

6. general contra-indications to Nimue treatments

7. tips to boost your sales

THE HISTORY OF NIMUE

- Nimue development started in 1994
- Originally developed by a plastic surgeon who was in search of a range to use pre and post operative to induce dermal change, healing and long term skin health.

NIMUE'S POINTS OF DIFFERENCE

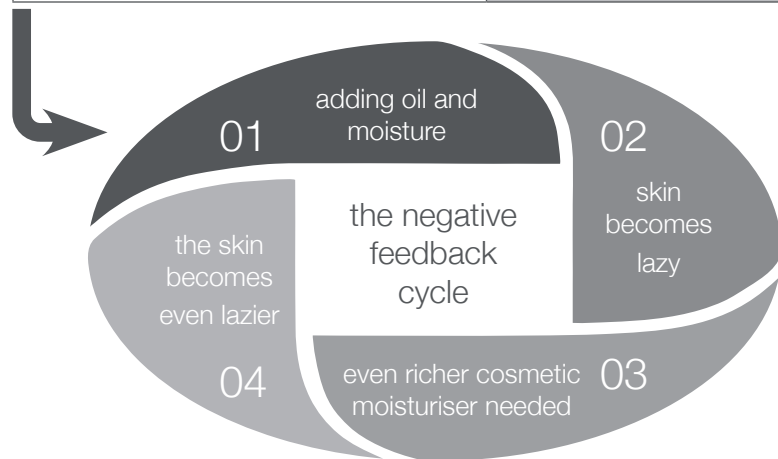

- Unique Alpha Hydroxy Acid concept to ensure maximum stimulation with minimum irritation
- Maximum concentrations used of the highest quality ingredients for optimal skin health improvement
- No animal testing
- No artificial fragrances used in the range
- No lanolin and mineral oil used in the range
- No paraben preservative system used (EU regulations)
- No granules used in the range
- The first Derma-cosmeceutical range
- Refill system
- Phytoceutical and biotechnological ingredients for a synergistic treatment approach
- 10 Delivery systems

NIMUE AS A DERMA-COSMECEUTICAL RANGE

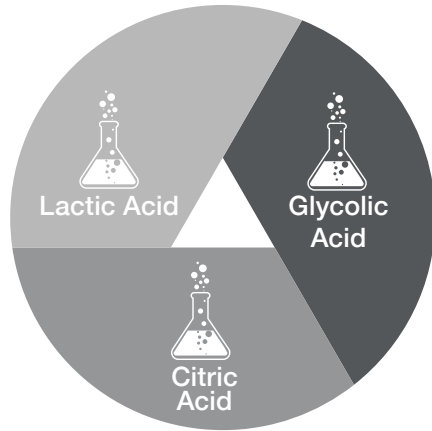

derma	=	dermal improvement
cosme	=	cosmetics
ceutical	=	pharmaceutical like benefits

TRADITIONAL COSMETICS VS DERMA-COSMECEUTICAL

cosmetics		derma-cosmeceutical	
skin cleansing <ul style="list-style-type: none"> • soap based cleanser • alkaline pH – strips skins natural acid mantle 	skin feels dry and tight	skin cleansing <ul style="list-style-type: none"> • acidic based cleansing medium • restores skin health without irritation 	skin feels moist and plump
day and night care <ul style="list-style-type: none"> • rich moisturisers • create negative feedback cycle • skin loses ability to hydrate itself • beautifying on superficial level 	feel a layer on top of the skin	day and night care <ul style="list-style-type: none"> • re-educate skin • skin hydrates itself • heal and restructure skin • treat signs of damage 	superior product penetration
sun protection <ul style="list-style-type: none"> • sunscreens high in chemical filters which may be harmful • may cause irritation to skin 	skin is left with a white layer and oily feel	sun protection <ul style="list-style-type: none"> • synergistically formulated • provide optimum protection • anti-ageing benefits • no irritation 	non-whitening and non-oily

NIMUE'S UNIQUE ALPHA HYDROXY ACID USAGE APPROACH

triple combination:

- hydration
- rejuvenation
- lightening and brightening

concentration

strength

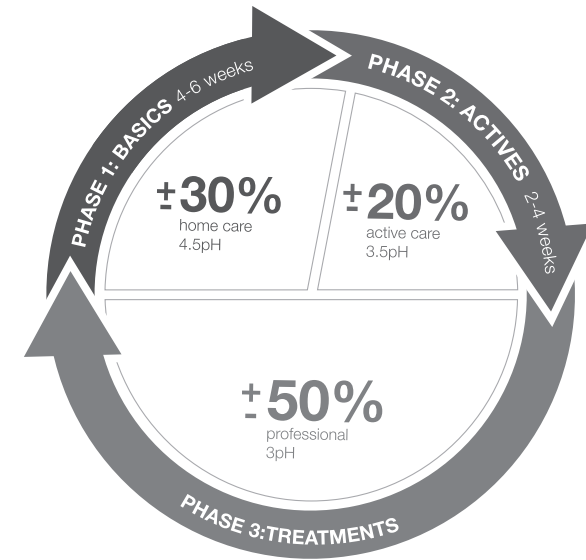

TRANSITIONAL PERIOD

temporary condition due to functional and structural changes in skin

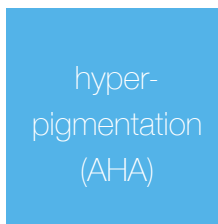

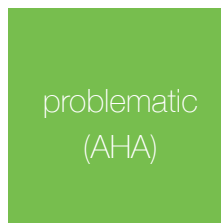

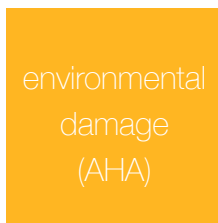

- visible from 2-4 weeks after starting Nimue
- continue for 4-6 weeks

I, _____, consent to the treatment known as _____ (select one of above treatments). The effect and nature of the treatment to be given as well as possible alternative methods of treatment, have been fully explained to me. I am advised that though good results are expected, they cannot and are not guaranteed to be effective, nor can there be any guarantee against untoward results. I am fully aware of the risk, if any and accept that Nimue shall not be held responsible for any damage, loss or liability incurred or suffered resulting from my participation.

- I have been informed fully and properly that, following any of the above treatment procedures, the following might occur:**
- Some skin discomfort during and after the procedure such as, tingling, itching, burning, tightness, dry patches and flaking or peeling of superficial layer of the skin.
 - Temporary skin reddening.
 - Breakouts resulting from the treatment procedure, which can be managed with home care.
 - These manifestations will gradually diminish over the course of a week. However, some clients might react differently and experience very few side effects or no flaking or peeling. Although rare, the skin may be uncomfortable and look like very bad sunburn. The flaking usually lasts about 3 to 7 days, although it might vary.
 - I have been advised to follow the prescribed application of Nimue home care products and that without daily use of sunscreen the treatment for my condition might fail.
 - Both the Salon and Nimue, where applicable, undertake to keep all of the information contained herein confidential and shall not disclose such information to any third parties, other than where reasonably required to do so by law or as otherwise authorised by the Client.
 - I understand that there is a small incidence of the reactivation of "cold sores" (herpes infection) in clients with a prior history of herpes. There is also an incidence of the flare up of acne-like lesions resulting from the peel.

Please note that in order for Nimue to engage with you, it will have to process certain Personal Information and Special Personal Information. By providing us with the required Personal Information and Special Personal Information, such act will be taken that you agree with the provisions where applicable and that you give consent to the processing by us of your Personal Information.

By affixing my signature to this Client Consent Form, I, _____

- hereby acknowledge and confirm that:
 - The skin treatment professional (the "Professional") is certified by Nimue Skin to perform the Microneedling Skin Treatment;
 - The Professional has opened a new Microneedle Roller from the sterile, sealed package in my presence and to my satisfaction, for my sole treatment;
 - The Professional has conveyed to me that the Microneedle Roller must only be used for my specific 6 part treatment;
 - The Microneedle Roller should only be used for my sole treatment and would be disposed of after 6 treatments;
 - The Microneedle Roller would be sterilised before and after each treatment in my presence, in accordance with Nimue Skin's procedural specifications; and
 - The Microneedle Roller would be stored in a sealed container, specifically and clearly displaying my name and treatment dates;
- Further acknowledge and confirm that:
 - I have received home care instructions as to how to care for my skin following my treatment and understand that by following the correct instructions, my results would be enhanced;
 - I understand and acknowledge that I could experience redness for a period after the treatment and that my skin could feel tender and/or sensitive for 1 to 2 days following treatment; and
 - A minimum course of 6 treatments, at monthly intervals, is required and that the results could only be visible after a minimum of 6 weeks;
- Based on the above, acknowledge and confirm that:
 - I have been properly addressed and informed regarding the procedures and benefits of the Microneedling Skin Treatment programme;
 - I hereby wish to proceed with the treatment; and
 - The Salon and the Professional have taken all reasonable steps and precautions to ensure that I have been properly informed of the procedures and benefits of the Microneedling Skin Treatment and to ensure my safety in administering the treatment; and
- I hereby acknowledge and agree to hold the Salon and/or the Professional harmless against any injury which could be sustained.

Please note that in order for Nimue to engage with you, it will have to process certain Personal Information and Special Personal Information. By providing us with the required Personal Information and Special Personal Information, such act will be taken that you agree with the provisions where applicable and that you give consent to the processing by us of your Personal Information.

GENERAL CONTRA-INDICATIONS TO NIMUE TREATMENTS

- Very sensitive skin and severe capillaries
- Dermatitis/Eczema
- Avoid Nimue Professional treatment for a minimum of 2 weeks and maximum of 8 weeks before and after IPL, laser, skin resurfacing and chemical peel procedures (dependent on the intensity of the treatment results)
- Avoid Nimue Professional treatments when using Cortisone, Isotretinoin, Accutanes.
- Active skin lesions or any skin infections
- Waxing, electrolysis, shaving or use of depilatory creams in the past 3 days
- Allergy to Aspirin - Nimue-SRC™ Problematic Treatment and Purifying Mask
- Botulinum Toxin injections and/or fillers - Wait 4 weeks after the Botulinum Toxin injections and fillers, before having a Nimue treatment. Botulinum Toxin injections and fillers can be done 3 days after a Nimue Professional Treatment.
- Skin cancer - avoid any treatments until a medical consent form is brought in.
- Treatments must be used on caution on darker skin and Phototypes iv, v and vi (4, 5 and 6).
- Facial surgery in the last 8 weeks (dependent on skin recovery and healing).

(For more specific contra-indications for individual treatments, please refer to the respective training manual. Nimue treatments must be used with caution.)

TIPS TO BOOST YOUR SALES

1. Importance of consultation as a way of opening the sale

Why do I need to do a consultation?

- Gather information about the client
- To determine the clients' needs and concerns
- Evaluate products the client is currently using
- Decide on what treatment to perform
- Determine if the client has any allergic reactions to specific ingredients
- Identify any contra-indications that will prevent specific treatment / treatments
- Eliminate unrealistic expectations
- Achieve maximum results for optimum skin health restoration through the recommendation of a homecare programme

2. Key points on how to sell

“Telling is not selling” - You are not there to sell a product. You are there to sell the value of what that product might be able to do for your client and the positive changes that it will create.

How do I sell?

- Acquire the necessary knowledge
- To convince your client of the benefits of the product or service that you are offering, you need to know it - thoroughly
- Make sure that you develop a good positive first impression
- Listen carefully and ask the right questions
- Keep eye contact, mirror your client
- Open ended questions during your consultation - How? Why? What? Where? When?
- Closed questions when closing the sale - Yes and No answers
- Silence is golden. Silence makes the client think about the final answer
- Forces a response and shows respect

TIPS TO BOOST YOUR SALES

3. How to overcome objections

An objection is not a NO or a rejection. It is a call for new information.

- Take a deep breath and relax and remember that it is not a no.
- Repeat the objection. This gives you a chance to gather your thoughts.
- Acknowledge your client's sales objection. By doing this you will start to build a relationship between yourself and the client.
- Determine if it is a true objection. The client may be looking for a reason not to buy.
- Most of all, stay positive and stay calm!

4. Closing the sale

Watch for verbal and non-verbal buying signals from your client. When you recognise these signals, avoid discussing more features and benefits with your client and move to a close.

- Verbal signals
Starts asking more questions about the product
- Non-verbal signals
Slowly nods their head
Touches and holds the products (buyer possessiveness)

Remember....selling is not all about "closing" the sale. We need to ensure that we build on long-term relationships with the client. Have a good plan for managing the client's future business with you.
